POKÉMON DOGE

Overview

Welcome to the Pokémon Ecosysytem

The Pokémon ecosystem comprises of 3 interrelated platforms:

Pokémon Casino - A licensed metaverse hotel and casino.
Pokémon Metaverse - A sports, esports, & crypto betting metaverse
The PokémonBC utility token powers the entire ecosystem and is the sole form of currency within the platforms.

About $PKD Token

The biggest difference between Pokémon and traditional gambling sites is that players can earn passive income by owning $PKD token. Which is a digital currency issued by Pokémon based on blockchain technology to share the bonus of platform growth with players. As a unified token for the Pokémon, $PKD has created a more fun game environment and higher revenue. $PKD holders not only get higher event bonuses, but also enjoy the daily fixed bonuses distributed by the platform. The more $PKD they hold, the higher the bonuses. In the future, as the $PKD continues to decrease, the price of the $PKD continue to increase. Players who hold $PKD for a long time can obtain excess profits in the future.

Pokemon Casino

Pokémon globalization is our important strategy for the better future Pokémon aims to provide the world-class gaming experience to the global users. Digital trending wave is sweeping the entire industry, We - Pokémon will inevitably provide our users the best meticulous, safe and secret services. POKÉMON DOGE

Business Model

Revolutionary Platform Combining Blockchain and Casino

Business model Pokemon is a revolutionary platform combining blockchain with a gambling platform, allowing users to gamble and use DeFi features. Users can mine $PKD tokens in the platform and acquire daily income by holding $PKD tokens. It's easy to make a profit on Pokemon, play and multiply $PKD tokens, users can stake and get rewarded according to their contribution.

The Basics

$PKD is a digital currency issued by Pokémon based on Doge Chainwith features of decentralization, anonymous transaction and security. $PKD has unique betting mining solution - every floating loss of users will produce a certain amount of $PKD, and players who hold $PKD can get a certain percentage of website profit from the dividend pool.

Pokémon Features

Games: Pokémon provides a variety of games with a pleasant experience that can be accessed by users such as sports, live casino, lottery, slot and fishing

Security: Gaming in Pokémon is safer since Pokémon's Defi solution that secure users payment, the security of user's money is most importance to us

Fairness: Users don't have to worry about the fairness of Pokémon, Pokémon with blockchain technology ensures that nothing can be manipulated on the platform

Multicurrency: Pokémon currently accepts most popular cryptocurrencies such as BTC, ETH and USDT

Certainty benefit for users: Users can get USDT daily income by holding $PKD tokens

$PKD can be freely traded: Users can trade their $PKD freely with other users using Pokémon Swap.
